Objective

To develop an understanding of the Adjust Pay Process

Outcome

An understanding of the process, key concepts, and menus is obtained.

Adjust Pay

The Adjust Pay process of SPAHRS occurs after the payroll process is completed and payments have been issued. The types of entries requiring adjustments include tax record changes, earnings code changes, deduction changes, employee terminations, payment of comp time (buyout), leave balance changes, and any other items that cannot be handled during the normal payroll process.

Also included in the Adjust Pay menu are Issue Payments and Void Warrant/EFT processes. The Issue Payment screen is used when an employee was not paid on the regularly scheduled payroll. The Void Warrant/EFT screen is input to facilitate the cancellation of payroll checks and electronic funds transfers.

It is very important to utilize the notes and comments sections on the various Adjust Pay transaction screens for documentation purposes. This documentation serves as a tracking mechanism to determine why an entry was made.

Automatic entries are generated by the system when transactions are entered for a pay period time record that has already been finalized and processed. The generated adjustments should be verified and approved for processing in a supplemental or regular run.

A number of browse screens are included in this menu to aid in the Adjust Pay process. These browses can be used to view Adjust Pay transactions and their status. In some instances these screens can be used to begin adding or modifying an adjustment record.

Your Action...	System Response...
1. Choose PA (Payment) from the Main Menu and press ENTER.	The Payment Menu will appear.

Adjust Earnings/Taxes/Deductions

After a final payroll has been processed, an employee's earnings may have to be adjusted due to unpaid leave taken, shift changes, retroactive pay increases, or other reasons as described in the Introduction section of this workbook. If a time record is entered or adjusted after a final payroll run and deviates from the record SPAHRS used for calculating payroll, the system will automatically create an adjustment transaction. If the report time entry does not result in a change to net pay, the adjustment transaction is automatically updated by the system and displays an approval code of **Z**. If a change in net pay results from the report time entry, the adjustment transaction appears on the Browse Adjustments Not Sent. The transaction may be accessed for action either from the Adjust Earnings screen or from the Browse Adjustments Not Sent screen.

An adjustment to taxes and/or deductions first requires a change to the worker's tax record or deduction record to support the adjustment needed. After the change is completed, an adjust earnings/tax/deduction is created by Adding a record. The adjustment process recalculates the worker's payment for the pay period specified and compares it by transaction code and amount to the previous pay period payment. All differences will appear as positive or negative amounts on the Adjust Earnings/Tax/Deduction screen. Transactions appearing on this screen with positive or negative amounts should be viewed to determine the desired adjustment has been calculated.

Please note that this screen is a mechanism to process the adjustments; therefore, prior to inputting the Adjust Earnings/Tax/Deductions screen, determine that all necessary corrections have been entered on the timesheet, tax, and deductions screens.

Your Action...	System Response...
1. Choose PA (Payment) from the Main Menu and press ENTER.	The Payment Menu will appear.
2. Choose AP (Adjust Pay) from the Payment Menu and press ENTER.	The Adjust Pay Menu will appear.
3. Choose AE (Adjust Earnings/Tax/Deductions) from the Adjust Pay Menu and press ENTER.	The Adjust Earnings/Tax/Deductions screen will appear.

Enter Yes if the adjustment is complete and ready to begin the approval process.</p>	
<p>8. Press ENTER.</p>	<p>Adjustment Record xxxx-000000000 modified successfully.</p>

Issue Payment

At the time that payroll was finalized and processed for an agency, an employee may have been omitted from the payroll. The causes can be such instances as a timesheet error, hire date after the payroll run, etc. When one of these occurs, an issue payment is required. The Issue Payment screen is used to generate pay when no payment has been previously issued for the pay period. Once all timesheets and other entries have been made for the employee, the Issue Payment process can begin.

Your Action...	System Response...
1. Choose PA (Payment) from the Main Menu and press ENTER.	The Payment Menu will appear.
2. Choose AP (Adjust Pay) from the Payment Menu and press ENTER.	The Adjust Pay Menu will appear.
3. Choose IP (Issue Payment) from the Adjust Pay Menu and press ENTER.	The Issue Payment screen will appear.

8. Press ENTER.	Adjustment Record 0000-0000000000 modified successfully

Void Warrant/EFT – Control Agency only

For each payroll warrant/EFT processed for an employee a record is added to the Void Warrant/EFT screen. This screen facilitates the process of voiding/reissuing a warrant or EFT. After a payroll has been run, a warrant or EFT may need to be voided. This may be due to incorrect issuance, lost warrant, etc. If the warrant or EFT is to be reissued, the warrant/EFT must be voided prior to the reissue.

The warrant/EFT number must be known to begin the void procedure. Per the MAAPP manual, the Department of Finance and Administration (DFA) requires a form to be completed prior to completion of this process; the form is to be submitted to them. DFA performs the final step to this process.

Your Action...	System Response
1. Choose PA (Payment) from the Main Menu and press ENTER.	The Payment Menu will appear.
2. Choose AP (Adjust Pay) from the Payment Menu and press ENTER.	The Adjust Pay Menu will appear.
3. Choose VO (Void Warrant/EFT) from the Adjust Pay Menu and press ENTER.	The Void Warrant/EFT screen will appear.

Browse Adjustments Approved

On the Browse Adjustments Approved, there is a field to indicate whether the adjustment is marked for supplemental. When preparing to run a supplemental, please review this listing so you will be aware of what adjustments will be processed. Review this browse after the supplemental has paid to see if anyone was missed. There may be adjustments for paying overtime, unused leave upon separation, insurance refunds, and additional time owed that were approved but never paid because it was not marked for supplemental. If an employee is no longer employed with the agency, an approved adjustment cannot be processed on a regular payroll. These adjustments need to be paid. If you have trouble marking the adjustment for supplemental, contact mash@dfa.ms.gov for assistance.

Other Payments Menu

The Other Payments Menu is used to facilitate payment of certain types of leave earned by an employee, to adjust leave balances when necessary, make payments/voids that cannot be created through other adjustment processes, and record disability payments that must be included on the W-2. The Maintain Buyout Params screen allows an agency to set up parameters for the payment of FLSA compensation, Agency compensation, and floating holiday leave earned. CALBK must be identified on the Position record prior to payment to the employee for the Agency compensation and Holiday leave earned. The Maintain Buyout Pay Status screen is used to exclude an employee's record from the buyout process. The Maintain Leave Balance screen is used to adjust various leave balances for an employee. It is important to note that leave balance is modified for the period that contains estimated accruals. Exception Pay and Third Party Sick Pay are for DFA entry only. Exception Pay creates an adjustment to pay transactions or back out transactions that cannot be done through the normal adjustment processes. The Exception Pay Request form must be completed and sent to DFA to be entered by them. This will create an adjustment to be processed on a supplemental payroll. Third Party Sick Pay is used by DFA to enter disability payments received from third party vendors that must be included on the yearly W-2.

Exception Pay- Limited Usage (DFA Entry Only)

The exception pay process is for a payroll adjustment that cannot be processed any other way in SPAHRS. For example, an exception pay may be required if there is a court ordered back pay or reinstatement and the tax or holiday tables for that period are no longer valid in the system or if a court order sets payment requirements that do not follow normal payroll calculations. It is also used to back out separation leave payments when the employee refunds the payment with a personal check.

Whenever exception pay is needed, SPAHRS will not perform any payroll calculations for taxes or retirement; all calculations must be manually performed by the agency. The calculation must include at least one earnings code. The deduction amounts for all taxes, retirement, and other deductions must be reflected on the form, along with the expected net pay for the transactions submitted. The employer matching amounts for FICA, Medicare, retirement, life insurance and health insurance premiums must also be shown separately. After all entries have been made, SPAHRS will calculate a net pay amount. The net pay cannot be less than zero. Based on the earnings code(s) and deductions entered, SPAHRS will calculate the taxable wage bases and validate any entries for FICA, Medicare, and retirement. A supplemental payroll must be run to process an Exception Pay Adjustment.

The system will add the payment to the year-to-date payment amounts reflected in SPAHRS and will record the information on the individual's W-2; however, the payment will not be reflected in the pay period-to-date totals within the system and will not be picked up for any future adjustments to the pay period.. The system will generate the individual and vendor payments when the payroll is processed. If the payment is for a pay period that is more than eighteen months in the past, and it includes retirement wages and contributions, the agency must submit a PERS Form 10 to have the individual's creditable service adjusted manually.

Since SPAHRS does not perform the payment calculations and only performs limited edits, the exception pay can only be entered into SPAHRS by DFA. When the agency has performed all manual calculations, a SPAHRS – Exception Pay Request Form (found at <https://www.dfa.ms.gov/media/6730/6316-spahrs-exception-pay-request-form.pdf>) must be completed and submitted to BFC Payroll office for processing. Instructions for completing this form is found at <https://www.dfa.ms.gov/media/6731/6317-spahrs-exception-pay-request-procedures.pdf>.

Adjust Pay Common Issues and Solutions

TOPIC	ISSUE	SOLUTION
Adjust Earnings	Employee tax information changed after payroll run.	After the applicable tax records have been modified, add an adjustment record (PA AP AE) for the pay periods involved. If an amount is due from the employee, either enter RCDCK on the timesheet for the amount the employee will pay back, or set up an MISCA deduction and deduct money from future payrolls.
Adjust Earnings	Attempting to pay a supplemental, but the Adjust Earnings screen brings up amounts on transaction codes that are not expected.	Check the entries for the transaction codes with amounts via the timesheet, taxes entered, and deduction transaction.
Adjust Earnings	Tax levy released after payroll processed but prior to warrant issued to employee.	End the deduction, add an adjustment record (PA AP AE), and refund the employee on the next supplemental payroll.
Adjust Earnings/Issue Pay	Gen SAAS/Calc Pay Distribution Difference Report has an employee listed.	Determine that the positive amounts in the net pay field are greater than the negative amounts. Net pay cannot be less than zero.
Adjust Earnings/Issue Pay/Separation	Adjustments were entered and approved but do not show up on the supplemental run.	The Supplemental field must = Y for inclusion on the next supplemental run. If left blank, the adjustment will be included in the regular payroll but only if the employee is on the next regular payroll. (Separation Pay should only be run on a Supplemental after all other payments have been made to the employee.)
Buyout	Some employees were paid on the buyout for agency comp, and some were not. They all should have been paid.	Verify that BUYCP was not entered on the individual timesheets. The buyout adjustment will not create if the code is entered on the timesheet and the Maintain Buyout Parm screen is processed for the same pay period.
Buyout	Want to use buyout code for FLSA, Holiday and Agency comp time.	A buyout code has been established for each type of comp time. The employee must be certified for CALBK to be eligible for Agency comp time and Holiday leave buyout.
Buyout	Attempting to do a timesheet override for an employee for EXTWK hours on a supplemental payroll.	Cannot do a timesheet override in this instance.

TOPIC	ISSUE	SOLUTION
Buyout	Need to exclude an employee from an approved Maintain Buyout.	Once the approval has been applied to the screen (PA AP OP BO) no exclusions can occur. An adjustment can be made for the next pay period.
Issue Payment	A timesheet was deleted for an employee prior to processing the regular payroll. I now need to pay this employee, but the adjust earnings screen did not process.	Since an initial payment was not issued for this employee during the regular payroll, this is not an adjustment to earnings; it is an original pay. Therefore, the Issue Payment screen (PA AP IP) should be used.
Leave	Employee paid for too many leave hours.	On the latest timesheet, input DOCKH for hours that should not have been paid; then have the employee pay back the difference. View the adjustment record (AE) for the pay period that the timesheet covers to obtain the amount to be paid back. Input RCDCK on the timesheet for the amount to be refunded.
Leave	An employee has been terminated. The employee's personal leave balance is incorrect. The actual accrual has been processed for the month in question.	Contact the MMRS Call Center for assistance in changing actual leave to estimated leave. After receiving notification from the MMRS Call Center, modify the leave by using the Maintain Leave Balance Screen (PA AP OP ML).
Leave	An employee termed one month and was rehired the next. A payment for the personal leave balance at the time of the termination is needed.	Make sure the leave balance is what it should be at the time of termination. If the balance is incorrect, process a Maintain Leave Balance adjustment (PA AP OP ML). Once the leave balance is correct for the termination date, process a Separation adjustment (PA AP SP). <i>After the separation adjustment has paid</i> , use the Maintain Leave Balance adjustment screen to add the new balance effective at the time the employee was rehired. Note: Pay the separation adjustment before you put the person back into the system as a rehire.
Leave	Employees need to be paid for agency comp time earned during the pay period.	Determine the employees are certified for CALBK on the Position record. Input the Maintain Buyout Params screen (PA AP OP BO). Verify employees for payment and exclude any that should not receive it. See workbook for additional procedures.
Leave	Only one employee needs to be paid for comp time earned.	Determine the employee is certified for CALBK on the Position record. Determine the applicable buyout code and input it on the appropriate timesheet.

TOPIC	ISSUE	SOLUTION
Leave	Employees have 240+ FLSA comp hours but system only shows the employees' agency comp time payment.	Automatic payments are included on the regular payroll when an employee exceeds the 240 FLSA hours in SPAHRS. (EM MP MD)
Void Warrant	Overpayment to employee prior to issuing warrant to employee.	Void employee warrant (PA AP VO). Complete the Void Warrant Form and submit to DFA along with the warrant (employee and vendor) to DFA.
